

**2-in-1 High-Precision Miniature Digital Level...**

- Measures Exact Angles of Machine-Tool Set Ups
- Measures Grades with Ultra Precision

Carpenter levels are just too large and inaccurate for machine set-up, and too clumsy for measuring model railroad track grades. So, we encased our high precision digital level in a compact housing that's only 2" square by 1" deep. At the press of a button, the large LCD reads the relative angle between machine surfaces or the percent grade from sea level. Embedded magnets attach it securely to cast-iron/steel surfaces for hands-free measurement.

Range: 0 to 45°/100%.  
Readability: 0.05°/0.01%.  
Hold button remembers last reading.  
Housing made from durable CNC-machined, satin-finish alloy. Includes battery.

#84519 Digital Level \$34.95

**Powered Detail Engraver You Use Like a Pen**

Our high-speed engraving tool lets you carve and engrave the finest details in metal, wood, plastic and glass. And, because it's so lightweight (just 2 ounces), you'll have more control than you ever thought possible. Beautifully finished machined aluminum barrel includes finger-tip On-Off push button switch; holds two AAA cells (included) for cordless power. Set-screw-type 3/32" chuck holds miniature diamond engraving bit (also included). Packed in a handsome molded gift case. *Color may vary.*

#84446 Engraver . . . . . \$19.95

#84447 Extra diamond bits, 3/32" shank (package of 2) \$5.95

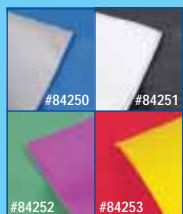

**Take Professional Quality Photos in Your Home or Shop**

*Ideal for miniatures, collectables, insurance records and web auctions!*

The Photo Studio in a Box is a light-weight, portable stage that is easy to set up on dining table, desktop or workbench. Use it with your digital or film camera to produce well-lighted images with balanced color and remarkable definition. Includes the following great features:

- A special heat-resistant diffuser "tent" (16" x 16" x 16") to eliminate harsh shadows and glare
- A reversible blue/gray non-reflective, seamless polyester fabric to hide unwanted background items
- Two studio-quality, high-output tungsten photo lamps with retractable legs and cushioned feet
- Camera stand with sturdy base and extendible neck
- Integral 31" long x 15" high storage/carrying case

**Heavy Duty Miter/Chop Saw Combines High Power with High Precision**

Overall size: 9" x 9" x 9"

Uses the same blades as the MicroLux Tilt Arbor Table Saw. See page 2 for more information.

The Proxxon Heavy Duty Miter/Chop Saw cuts and miters both small- and large-size hobby materials quickly and precisely. The rotating work table incorporates a beautifully machined vise which clamps the workpiece at the exact angle you need. The smooth-running saw head adjusts left/right to minimize the gap between the vise and the blade to eliminate accuracy-robbing deflection or vibration of workpieces. Vise jaws have a V-groove to securely hold round pieces, plus a top groove to hold thin stock. The blade is belt-driven at 4,000 rpm by a 1/4 hp DC motor. Cutting capacity is 1" at 90° and 3/4" at 45°. The base rotates 45° in both directions from 0, with latching detents every 15° for quick and accurate set up. Includes 3-1/8" dia. carbide-tipped saw blade for cutting non-ferrous metals, wood and plastic, plus finger-tip safety release, motor-start switch, automatic blade guard and adjustable stop plate for lengths up to 12". Plugs into 120v AC wall socket.
