Wiring ideas for #82611 Micro Switches

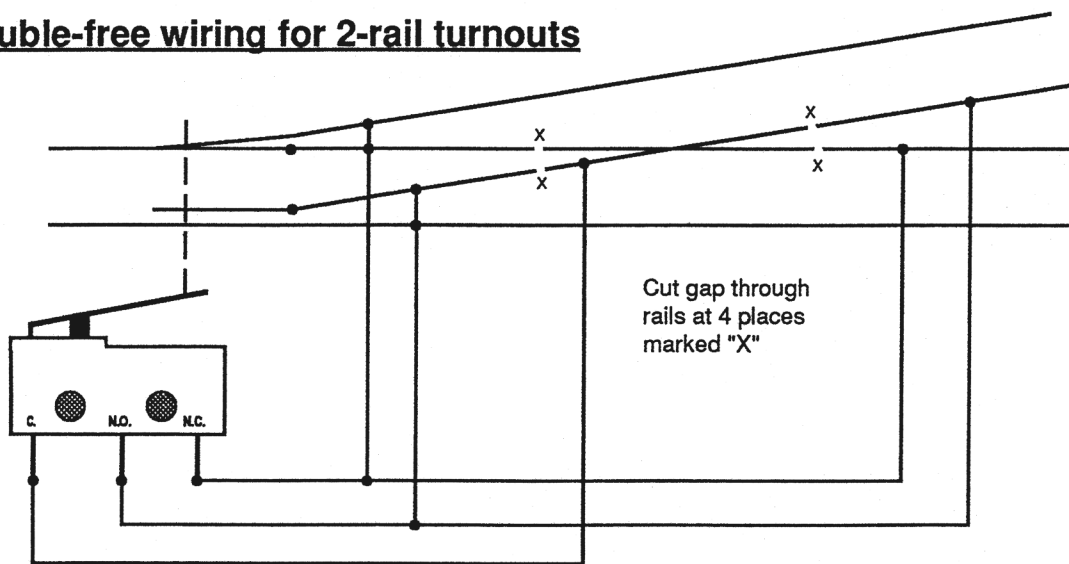

Berkeley Heights, NJ 07922  
Tech Service 1-908-464-1094

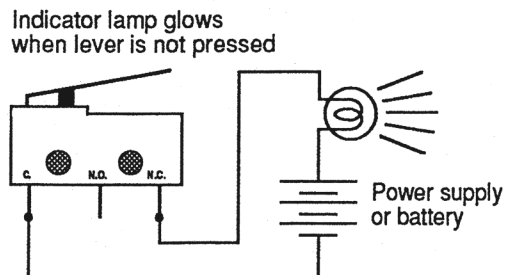

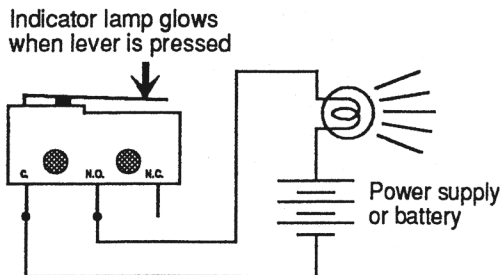

C = Common    N.O. = Normally Open to Common    N.C. = Normally Closed to Common

Note: An open circuit makes no connection.  
A closed circuit makes a connection.  
No pressure on the lever is the normal position for this switch.

## Trouble-free wiring for 2-rail turnouts

## Indicator Lights

Note: Do not overheat the switch terminals while soldering wires to them; otherwise, the switch will be damaged.
