

IPT-M1 10 Magic Putty (Epoxy Putty)

Key Features

Magic Putty is a two-component epoxy putty in one box, one resin and one hardener.
Magic Putty is mixed one to one by volume in small quantities as you need it.
Almost anything can be used as an armature, such as; armature wire, metal mesh, styrofoam, wood and balled up tin foil.

Mixing Instruction :

Once you have completely mixed the two components, you have about 30min to 40min of working time. (depending on the temperature in your workspace, cold = longer working time, hot = shorter working time)
Magic putty will cure fully overnight to a rock hard finish that is easily painted.

EMERGENCY AND FIRST AID PROCEDURES

EYES : For eye contact, immediately flush eyes for at least 15 minutes with running water.
Hold eyelids apart to endure rinsing of the entire eye surface with water.
Get immediate medical attention.

SKIN : For skin contact, wipe away excess material with a dry towel.
Then wash affected area with plenty of water and soap if available for several minutes.
Get medical attention if irritation occurs.

INGESTION : If swallowed, give at least 3-4 glasses of water, but do not induce vomiting.
If vomiting occurs, give water again.
Do not give anything by mouth to an unconscious or convulsing person.
Get medical attention. Have physician determine whether vomiting or stomach evacuation is necessary.

INHALATION : If inhaled, remove from area to fresh air.
Get medical attention if respiratory irritation develops or if breathing becomes difficult.

OTHER : Promptly remove wet, contaminated non-impervious clothing. Wash before reuse.

NET WEIGHT : RESIN 55g HARDENER 55g
Mix Ratio : 1 : 1
Working Time : 30Minutes
Full Cure Time : 12Hours (75.2°F)
