

IPT-P110 Premium Magic Putty

(Epoxy Putty)

Key Features :

Premium Magic Putty is a two-component epoxy putty in one box, one resin and one hardener. Premium Magic Putty is mixed one to one by volume in small quantities as you need it. Almost anything can be used as an armature, such as; armature wire, metal mesh, styrofoam, wood and balled up tin foil.

Mixing Instruction

Once you have completely mixed the two components, you have about 1.5hr to 2hr of working time. (depending on the temperature in your workspace, cold = longer working time, hot = shorter working time)

Magic putty will cure fully overnight to a rock hard finish that is easily painted.

Dip your hands in water while mixing if the Premium Magic Putty becomes sticky.

Wash hands between mixes to keep it from sticking to your hands. Gloves are not necessary but will keep the Premium Magic Putty from underneath your fingernails and cut out fingerprints on finished works.

The surface of your Premium Magic putty sculpture can be smoothed with water before it cures.

EMERGENCY AND FIRST AID PROCEDURES

EYES : For eye contact, immediately flush eyes for at least 15 minutes with running water. Hold eyelids apart to endure rinsing of the entire eye surface with water. Get immediate medical attention.

SKIN : For skin contact, wash with large amounts of running water, and soap if available, for 15 minutes. Remove contaminated clothing and shoes. Get immediate medical attention. Discard or decontaminate clothing before re-use and destroy contaminated shoes.

INGESTION : If swallowed, give at least 3-4 glasses of water, but do not induce vomiting. If vomiting occurs, give water again. Do not give anything by mouth to an unconscious or convulsing person. Get medical attention. Have physician determine whether vomiting or stomach evacuation is necessary.

INHALATION : If inhaled, remove from area to fresh air. Get medical attention if respiratory irritation develops or if breathing becomes difficult.

OTHER : Promptly remove wet, contaminated non-impervious clothing. Wash before reuse.

NET WEIGHT : RESIN 55g HARDENER 55g

Mix Ratio : 1 : 1

Working Time : 2Hours

Full Cure Time : 12Hours (75.2°F)
